SAVE THE GALAXY: RELOADED

Анка

Пулемётчица Красной Армии.
Настоящая русская женщина. Как говорят
русские: «И в горящую избу войдет, и коня
на скаку остановит». Ходят слухи, что у
них с Петькой что-то есть.

Anka

Red Army's heavy gunner. True Russian woman. As Russians say "She
will halt a galloping horse, she will enter a burning hut". Somebody say
that there is something between her and Peter.

This game, while mechanically being a classical point and click adventure, is probably oozing more slav-spirit than anything I have ever played before.

This is on a level of politically biased that it becomes one of the most hilarious pieces of adventure gaming I have seen in the last 25 years.

I don't speak a single word of Russian, but the synchronisation was highly hilarious all the same. And even although the game isn't that long, it sports a lot of content, considering its actual age.

I had never heard of this before, but I am so glad I got to play this. I'm actually quite looking forward to playing the other two games as well.

The only thing that really needs to be put out there: This is probably one of the least kid-friendly adventures I have ever seen.
